Feeding table

- Use only the scoop provided in the tin. To make 100 ml Kabrita Follow-on formula:
add 3 level scoops of powder (13.5 g) to 90 ml water.

| Baby's approx. age | No. of feeds per 24 hours | No. of level scoops | Water per feed (ml) |
|--------------------|---------------------------|---------------------|---------------------|
| 6-8 months | 4 | 6 | 180 |
| 9-12 months | 3 | 6 | 180 |

Preparation

Prepare the milk no more than 1 hour before feeding. Wash your hands thoroughly before preparing the milk.

1. Sterilize utensils according to manufacturers guidelines.
2. Fill the bottle with the correct amount of boiled water that has been cooled down for no more than 30 min.
3. Add the indicated amount of Kabrita 2 to the corresponding amount of water.
4. Cap the bottle and shake well until the powder is dissolved.
5. Cool under running tap, and test the temperature on the inside of your wrist.
